

# BIGHORN

## WUI

BME's Wildland Urban Interface (WUI) Engine is the future of firefighting. The WUI offers the versatility to respond to both structural and wildland fire situations. With increased maneuverability, 1250 - 1500 GPM midship pump, wildland pump and roll capability, this engine provides a lot of resources for a lower cost. It can be deployed on contract fires, meets ISO insurance requirements, and is a multi-use engine that can operate in many environments.

# SPECS
