

SIERRA

MINI PUMPER

Due to its compact size, BME's Mini Pumper is the ideal fire apparatus for dealing with hard-to-reach fires with little to no road access. The Sierra is built to fit the needs of individual departments. It's user-friendly, cost-effective, agile, and does not require a special license to operate. It's built with 4WD (or 2WD) with 300 gallons of water and a 750-1500 GPM pump.
